--------------------------------------	--	--

I- Read the following text then do the tasks below:

The small three key steps to creativity are copy, transform, and combine. Human beings are born creative as from early stages on, we find innovative ways to negotiate life. The most creative people find ways around obstacles because they see them not just as roadblocks, but also as opportunities. Creativity expands our perceptions to produce new ways of problem-solving from the simplest to the most complicated ones. Being creative helps you become a better problem solver in all areas of your life and work. Instead of coming from a linear logical approach, your creative side can approach a situation from different angles. Moreover, creativity helps you see things differently and deal better with uncertainty. Creativity is the ability to join ideas together in a unique way or to make uncommon connections between ideas. It allows individuals to develop different ideas and methods to use when approaching tasks and problems. Most individuals have creative potentials, but they do not know how to access them. We often think about creativity as making something, but in fact the root meaning of the word is 'to grow'. When we are creative we feel as if the world and all that in it is vibrantly alive. Creativity's by-products are some of the major achievements of civilization such as the invention of the wheel to Mozart's sonatas. Creative thinking decreases negative emotions, reduces stress and anxiety, and improves medical outcomes. Therefore, it does not only help you live longer, but also it can improve your quality of life. Engaging in the creative process builds great confidence, because you find out that failure is survivable and it is a part of the process. In addition, it helps us develop our work more and more, so that we can release the fear and try new things even at the risk of failing.

A. Choose the right answer a, b, c or d:

- Creative people can overcome obstacles because they see them as success.
